WE'VE trawled through the TD Window Seat archives to give you a blast from the past. Here's some gems from 06 Feb 2014:

**GLOBAL** aviation has suffered a tragic setback in the last week or so, after the US Federal Aviation Administration officially grounded a special beerdelivering drone aircraft.

The high-tech gadget was the brainchild of Lakemaid Beers, based in Wisconsin, which planned to use the remotely controlled aircraft to deliver urgent alcohol supplies to people fishing on lakes in Minnesota and Wisconsin.

An announcement by Lakemaid Beer CEO Jack Supple last week was quickly followed up by the FAA, which informed him the proposal was a violation of safety regulations.

"I'm on the FAA blacklist for now," he told the New York Daily News.
