## Icon under a microscope

**THIS** landmark is iconic and easily recognisable when you see the whole picture, but can you identify it from this small portion of the image?

Known by another name for many years, this incredible rock

is considered one of the greatest natural wonders of the world and is one of the largest monoliths, measuring 348m tall.

The rock itself is around 550 million years old and has deep spiritual meaning to the locals.

## A-maze-ing

**CAN** you find your way through this maze? Start at the top and finish at the bottom.

## Funnies Flashback

**WE'VE** trawled through the *TD* Window Seat archives to give you a blast from the past. Here's some gems from 04 Sep 2014:

**SOME** travellers set crazy demands for the care of their pets while on holidays.

According to a survey of 8,000 people by Small Luxury Hotels of the World, 15.1% said they would gladly pay a supplement for their pets to be pampered.

Some of the demands received range from the basic grooming & dog beds to the extreme such as high-end pata negra ham, caviar and blueberry facials.

Dog owners in China provided some of the weirdest requests including unlimited playtime & even a "sausage dog girlfriend".

Aussies aren't exempt, with one Burmese cat owner asking for somebody to repeatedly assure her cat "how beautiful she was".

## Famous faces

**THERE** are three different faces that make up this picture.

They are a mixture of famous celebrities and travel names.

Can you figure out who the

eyes, nose and mouth in this picture belong to?

And don't worry if you can't guess them all, two out of three ain't bad!

ANSWERS 06 AUG  
Icon under a microscope: Uluru, Northern Territory, Australia  
Celebrity faces: Eyes - Phillipa Harrison, Tourism Australia, Nose - Donald Trump, Mouth - Helen Mirren
