

Explore Austria by Train

Not only is traveling by train one of the most sustainable ways to get around in Austria but also the most comfortable and efficient. Whether your clients are travelling between major cities or want to discover the smaller villages – the network of the Federal Railways takes them wherever their journey takes them. **Three different travel classes** (economy, business, first) accommodates your clients' style of travel. **Vienna's International Airport is seamlessly connected** with the rest of the country. Direct trains to Salzburg, Innsbruck and Graz allow a relaxed journey to the final destination after a long flight. Tickets can be **easily booked online or through the ÖBB app**.

A train journey with UNESCO views?

One of the most stunning, and historically significant train routes in Austria is the two-hour journey from Vienna to the southern city of Graz leads across Semmering mountain pass – across an astounding 19th-century viaduct that became a UNESCO World Heritage Site. About halfway between Vienna and Graz, Semmering mountain reaches upward with dramatic pitch. It's hard to imagine how a train could traverse the pass today, let alone in 1848 when the Semmering Railway was built. Made up of 41 km of tunnels and viaducts, it represents maybe the most impressive feat of civil engineering in the era of early railway construction

(according to UNESCO).

With ÖBB, you can reach Graz from Vienna in just over 2.5 hours - 17 times per day.

Using ÖBB Nightjet, the Austrian Federal Railways' night train, allows your clients to comfortably travel to some of Austria and Europe's most popular destinations with cosy sleeper cars, couchette coaches and day coaches.
